

AKSHITA GOEL

+91-9528441723 | akshitagoel11@gmail.com

Education

K.R Mangalam University (Gurugram), India

2023 - 2027

- BTech CSE (with specialization in AI&ML) | CGPA: 9.12

SILVER BELLS PUBLIC SCHOOL

2022- 2023

- CBSE(Class XII) | Percentage: 88.8

ST. FRANCIS SCHOOL

2020 –2021

- ICSE (Class X) | Percentage: 86.8

Skills

Python | SQL | MS Excel | HTML | CSS | Windows

Certifications

Data Analysis with Python

By : IBM Developer Skills Network

November 1,2023

Foundation To AI Data Science & Analytics

By : Samatrix.io

January 10,2024

Projects

Hotel Management System (Based on Python & MySql)

January 2023

Database Design :

- An important aspect of system design is the design of data storage structure.
- To begin with a logical model of data structure is developed first.
- A database is a container object which contains tables, queries, reports and data validation policies enforcement rules or constraints etc.
- A logical data often represented as a records are kept in different tables after reducing anomalies and redundancies.
- The goodness of data base design lies in the table structure and its relationship.

Academic and Extracurricular Achievements

- Successfully completed an intensive **Web Development** workshop, gaining hands-on experience in front-end development technologies.
- Collaborated with peers on various group projects to enhance **problem-solving** and **teamwork** skills.
- Received positive feedback for my ability to explain concepts in a patient and understandable manner.
